# Enzyme Plus

## Microbial control of fats, oils and grease in drains

A super strength bacteria in liquid form that will ensure that drains and traps are kept free from the build-up of fats, oils and grease.

### What is Enzyme Plus?

Enzyme Plus is a specialised super strength, concentrated biological treatment for degrading grease in waste water systems. The product contains natural bacterial strains which digest fats, oils and greases and other organic matter through their enzymatic metabolism.

### How does Enzyme Plus work?

Enzyme Plus breaks down fats, oils and greases in two phases. Firstly, they are broken down into glycerol and free fatty acids using microbial lipase. Secondly Enzyme Plus breaks down the free fatty acids into smaller, soluble molecules using specialist microbial pathways. This is an irreversible process so fats cannot build up further down the pipe.

BIO PRODUCT

DRAIN MAINTAINER

### Key Features and Benefits of Enzyme Plus.

- Digests fats, oils and greases.
- Improves flow in drain lines.
- Effectively reduces odours.
- Digests solids completely.
- Reduces biochemical oxygen demand (BOD) levels, reducing sewage costs.
- Uses a safe stable blend of Bacillus spores.
- Withstands a wide range of pH and temperatures.
- Reduces blockages.
- Negates the need for grease trap pumping when used regularly.

### How do you use Enzyme Plus?

The best results are achieved by dosing on a daily basis, if possible on a system which has already been thoroughly cleaned out as this will bring quicker results in the long term.

It is always best to use Enzyme Plus one hour after all work is completed in the area or in the quieter periods of the day. Dose either through sink holes, drains or directly into the trap. Dosing rates for drainage runs should be 250ml for every 15 metres of drain run to be protected. Daily dosing rates for grease traps to a volume of 300 litres should be 250ml a day. **Always read instructions and safety data sheets carefully before use.**

### Enzyme Plus is recommended for use with:

**Drainworks Dosing System:** A system designed to dose drains with the correct quantity of Enzyme Plus at the right time of day without anyone being there. This also ensures that dosing actually happens.

**Bio Ball:** A super strength bacteria in a solid form that will ensure that traps and tanks are kept free from the build-up of fats, oils and greases

**Bio Clean:** A liquid biological surfactant used for cleaning areas where a bio solution is at work in the drainage system

**If you do not want to pay for pumping out or clearing messy grease traps or drainage runs naturally use Enzyme Plus**
