

Lava Flow

fixes costly leaks even if you can't find them.

Natural, porous wonder-product fixes costly leaks even if you can't find them.

What is New Lava Flow?

Leaking flat roofs can cause expensive damage. The longer they leak the more costs spiral and the longer it takes to put the damage right. It can often be impossible to locate the source of the leak especially in poor weather conditions.

Lava Flow solves this problem with its natural porous composition that expands to 15 times its own size in minutes, filling any gaps and fixing leaks instantly.

Lava Flow is ideal for using in wet conditions as it follows the flow of water straight to the leak. Lava Flow is ideal for emergencies and is totally non-toxic.

How does Lava Flow Work?

Lava Flow is a specially formulated, micro porous, natural material. When exposed to wet conditions Lava Flow slowly expands up to 15 times its original size blocking the flow of water into cracked or damaged surfaces especially on flat roofs and halts the extensive damage often caused by leaks.

Key Features and Benefits of Lava Flow?

Fixes costly leaks in minutes.

Flows freely in water to locate and fix leaks on flat roofs (even those with loose chippings).

Ideal for use in an emergency.

Use in wet weather and poor external conditions.

No special equipment or training required for application.

Natural, non-toxic formulation.

Technical Information

Always ensure that precautionary measures found in the MSDS sheet for Lava Flow are read and followed before use.
