

ECOSORB

A fire retardent, organic, loose absorbent for most liquids

Spill control

Spills of oil, coolants, refrigerants and chemicals can cause hazards in the workplace or in public areas. Ecosorb is the solution to those problems.

What is Ecosorb?

Ecosorb is an organic, loose absorbent which has been specially treated to make it fire retardant. It is absorbent with approximately twice the absorbency of granules.

Ecosorb is very light to carry and apply because it is soft and dust free. It is easy to sweep up and does not mark painted floors

How does Ecosorb work?

Keep a container of Ecosorb in any area where a spill is likely. When a spill happens, simply apply enough product to absorb the spill, wait a few minutes and sweep up the now absorbed spill. n.b Ecosorb can be swept up and re-used until saturated.

Key Features and Benefits of Ecosorb?

Cost effective

Highly absorbent capillary action Approximately twice the absorbency of clay materials Fire retardant (BS476 Part 7 Class 2 1987) Non-Carcinogenic

Unlike Clay Granules

User friendly - very light to carry and apply Does not stick to floor - easy to sweep up Soft and dust free - does not mark painted floors Can be incinerated - produces only 7% ash Absorbs immediately on application prevents spreading
