

DIAMOND WIPES

BRILLIANT results achieved from very little effort

What are Diamond Wipes?

Diamond Wipes are an easy to use wipe developed to quickly remove dirt and smudges on glass and shiny surfaces without leaving any streaks and smears.

How do Diamond Wipes work?

Diamond Wipes contain a mild alkaline/solvent solution which has been formulated to break down dirt on shiny surfaces including glass, metal and stone.

1. Firstly the chemical within the wipes breaks down dirt very quickly by wiping the surface.
2. Next the dirt is absorbed into the wipe leaving the surface super clean.
3. Finally any remaining cleaner quickly evaporates to leave the surface free of smears, streaks and smudges.

Key features and benefits of Diamond Wipes

- Saves time by not having to go back over surfaces to re-clean smears.
- Highly effective, saves time and increases productivity.
- Easy to use and comes in a easy to carry bucket, which eliminates the need to carry around numerous cloths and sprays.

Where can Diamond Wipes be used?

Windows, Mirrors, Glass and Plexi-glass. Marble, Granite, Tiles or any Polished Stone. Stainless Steel, Chrome, Brass and Copper, Bathroom Fixtures, Lift Fittings and Hand Rails. Car Windscreens, Windows, Headlights and Indicators. Computer Monitors and Keyboards. Optical lenses, Spectacles and Safety Glasses.
