

LEAK DETECTOR SPRAY

Non Toxic Leak Detector

What is the problem?

finding small gas leaks in pipes and fittings.

What is Leak Detector Spray?

Leak Detector Spray is a special blend of ammonia and surfactants designed to trace even the tiniest leaks in pipes and fittings.

What are the advantages?

Unlike soap and detergent based products LDS produces a microporous stable foam which indicates the precise position of the leak instantly. LDS is Non flammable and is completely bio-degradable. Additionally it will not form combustible mixtures with other gases.

Where can Leak Detector Spray be used?

LDS can be used to detect leaks on compressed air lines, methane lines and leaks on most industrial gas applications.

How is Leak Detector Spray used?

Simply spray onto the area of the leak. Formation of a stream of bubbles will indicate the exact location of the leak. LDS's nitrogen propellant instantly disperses to prevent ghost leak observations. Any dried residues are water washable but LDS is completely non corrosive.

Health and Safety

Always ensure that precautionary measures found in the MSDS sheet for Leak Detector Spray are read and followed before use and please ensure that appropriate PPE is used when preparing, mixing and applying products.

IMG Distributors Riverside Ind. Estate, Fazeley, Tamworth, Staffordshire B78 3RW.

The IM Group utilizes a process of continuous product improvement for all of our products. While the IM Group strictly adhere to our products specifications, we routinely implement product improvements. Therefore, please contact us for our most current product specifications. The IM Group warrants the quality of this product when used according to directions. Apply protective coatings per Company Standards. User shall determine suitability of product for use and assumes all risk. The seller will not accept liability for more than product replacement.
