

CHLORINE TABLETS

Bleach disinfectant tablets.

What are Chlorine Tablets?

Chlorine Tablets are a powerful bleach disinfectant tablet based upon a chlorine donor agent that is more stable than conventional sodium hypochlorite.

How do Chlorine Tablets work?

Chlorine Tablets are used as a general purpose bleach, for cleaning and sanitising hard surfaces, pipes, drains, sinks, toilets and urinals, etc.

Chlorine Tablets can be used for salad washing at suitable dilutions between 25 and 50ppm.

The tablets can also be used as recommended in hot tubs, spas, whirlpools etc. Chlorine removes pathogens in water, keeping waterborne diseases at bay.

How to get the best results

For general sanitising dilute one tablet in 5 litres of water to give a 200 ppm chlorine concentration. For heavy duty sanitising dilute one tablet in 1 litre of water to give a 1000ppm chlorine solution.

Dilute as required for killing bacteria on previously cleaned surfaces.

Key features and benefits of Chlorine Tablets

- Appearance: White tablet
- Odour: Slight Chlorine
- Bleach in a tablet form, makes this product safer than storing large amounts of liquid, whilst also saving space.
- Saves money, compared to buying large amounts of liquid bleach.

Storage

- Do not store at extremes of temperature.
- Keep dry.
- Keep out of reach of children.

Health and Safety

Always ensure that precautionary measures found in the MSDS sheet for Chlorine Tablets are read and followed before use and please ensure that appropriate PPE is used when preparing, mixing and applying products.
